

CvarcLogger — What's New in 2.08

Update from version 2.07

This update adds support for SKCC (Straight Key Century Club) operating — looking up members' SKCC numbers, seeing member status at a glance while you log, and scoring SKCC contests directly in the app.

Look Up SKCC Numbers Automatically

You no longer have to remember or manually look up another station's SKCC number. CvarcLogger can now check the SKCC member roster for you in three places:

- **Editing a QSO:** Open any logged contact and click the new "Lookup" button next to the SKCC # field — it checks the station's callsign against the SKCC roster and fills in their number.
- **Bulk Edit:** Select a batch of QSOs and click "Lookup SKCC # for Selected." Unlike other Bulk Edit fields, this looks up each QSO's own contact individually, so a mix of members and non-members in your selection is handled correctly.
- **While logging:** If you didn't type in an SKCC number yourself, the program now checks automatically when you log the QSO and fills it in if the station is a member.

See Member Status While You Log

The entry form now shows two new things next to the SKCC # field, updating live as you type:

- **Tier badge:** A small colored circle appears showing the station's SKCC award level — gold for Senator, silver for Tribune, bronze for Centurion.
- **Exchange preview:** A line underneath the SKCC # field shows a quick readback of what you've copied so far — callsign, RST, state, name, and SKCC number — so you can double-check it before logging.

Score SKCC Contests

The SKCC tab under Contests (previously "Coming Soon") is now a working scorer. It supports:

- Weekday Sprint (SKS)
- Weekend Sprintathon (WES)
- Europe Sprint (SKSE)

- Asia Sprint (SKSA)
- QSO Party

Scoring rules were pulled directly from SKCC's own published rules for each event, not guessed — so the numbers should match what you'd get submitting by hand. The scorer works out your QSO points, multipliers (unique states/provinces/countries worked), and bonus points for every Centurion, Tribune, and Senator you contacted, plus event-specific bonuses like working the special club station or unique grid squares, straight from your log. A couple of bonuses that can't be figured out from the log automatically — like the QSO Party's photo/soapbox bonus, or each sprint's specially-designated bonus station — have a simple box to enter them by hand.

Note: South America Sprint and Slow Speed Saunter aren't scored yet — SKCC doesn't appear to publish separate official rules for these, so rather than guess, the scorer simply doesn't offer them as an option.
